

Policy Lab - 25 April 2017 - Brussels, Representation of Lower Saxony to the EU

PROGRAMME

THE LONG TAIL OF SCIENCE?
Humanities, Social Sciences
& Open Science and Innovation

THE LONG TAIL OF SCIENCE?

Humanities, Social Sciences & Open Science and Innovation

16.30 // 17.00

REGISTRATION

17.00 // 17.05

WELCOME ADDRESS

MICHAEL FREERICKS

Head of the Representation of Lower Saxony to the EU

17.05 // 18.25

PRESENTATIONS AND PANEL DISCUSSION

The Guild Policy Lab on Humanities, Social Sciences, and Open Science and Innovation brings together some of our leading scientists who have worked on Open Science and Open Innovation. They will examine the opportunities of Open Science and Open Innovation for research in Humanities and Social Sciences and how European institutions can best engage with it. Finally, they will discuss the potential for shared networks, research and communication flows for researchers in the Humanities and Social Sciences.

SPEAKERS

PROF. GERHARD LAUER

University of Göttingen

The Case for Corpora. Open Scholarship in the Digital Age

PROF. SHEILA ANDERSON

King's College London

Science: the use of the term science explicitly includes the arts and humanities (Realising the European Open Science Cloud, 2016).
An explicit view on Open Science and Open Innovation.

PROF. EIVIND ENGBRETSSEN

University of Oslo

Open Science and the Interfaces between Science, Social Science and the Humanities

RESPONDENT

FABIENNE GAUTIER

Head of Unit, Directorate-General for Research & Innovation,
European Commission

MODERATOR

PROF. JAN PALMOWSKI

Secretary General, The Guild of European Research-Intensive Universities

18.25 // 18.30

CLOSING REMARKS

18.30 // 20.00

NETWORKING RECEPTION

ABOUT THE SPEAKERS

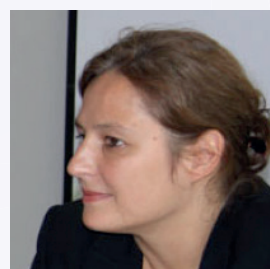

Gerhard Lauer was appointed Chair of German Philology at the University of Göttingen in 2002. His research focusses on the relationship between mental processes and the structure of literary texts, and laws and regularities which determine the cultural evolution of literature and literary meaning. Recently, models and methods of both cognitive science and computer philology have gained influence on his work. Professor Lauer is Vice Director of the Lichtenberg-Kolleg, a member of various initiatives in the field of Digital Humanities, and a member of the Academy of Sciences of Göttingen.

Sheila Anderson joined King's College London in 2000 as Director of the Arts and Humanities Data Service mixing running a service with a programme of applied research in digital curation and digital infrastructures. In 2008 she established the Centre for e-Research which she directed until April 2012. With colleagues in Digital Humanities, Sheila was responsible for designing, developing and launching (in 2010) the MA in Digital Asset Management. Sheila is involved in a number of large European Humanities Research Infrastructure projects working with researchers across different disciplines and with libraries and archives.

Eivind Engebretsen is currently appointed (2015) Research Director at the Faculty of Medicine (University of Oslo) with the academic responsibility for the first medical postdoctoral training programme in Norway. He has a background in intellectual history and is a qualified professor in health science, human science and social science. His current research is mainly concerned with the discourse of "knowledge translation" within medicine, its different genealogies and how it might be expanded by drawing on theories of translation from linguistics, philosophy and anthropology. His research in this area has gained international recognition.

Fabienne Gautier was nominated Head of Unit of the European Research Area (ERA) Policy and Reform Unit in the European Commission (DG Research and Innovation) in June 2014. Since September 2012 she was Acting Head of the Unit, and since April 2011 Deputy Head of Unit. She supports the coordination and development of an ERA Policy Framework as part of the Innovation Union Flagship Initiative of the EU's Europe 2020 Strategy.

Jan Palmowski became the Guild's first Secretary-General upon its creation, on 1 June 2016. A contemporary historian, he started his career at the University of Oxford, before moving to King's college London where he taught on European politics and EU integration. He was appointed Pro-Vice Chancellor at Warwick University in 2013. His international engagements include membership of the Strategy Commission of the German Science Council (2013-2016), and the Excellence Commission's joint expert group (from 2016).

THE GUILD LAUNCH SERIES
